

# MANDADI VENU MADHAV REDDY

## COMPUTER SCIENCE GRADUATE

Hyderabad, India | +91 7981962604 | venumandadi31@gmail.com | [LinkedIn](#) | [GitHub](#)

### PROFESSIONAL SUMMARY

Computer Science graduate specialising in Artificial Intelligence and Machine Learning, with web development internship experience and hands-on projects in full-stack engineering, backend APIs, data analytics and machine learning. Built tested applications using Java, Python, TypeScript, SQL and cloud deployment, with a focus on clear data flow, failure handling and reproducible results.

### TECHNICAL SKILLS

**Languages:** Java, Python, JavaScript, TypeScript, SQL, C

**Backend and Web:** Spring Boot, FastAPI, Flask, Node.js, Express.js, REST APIs, JWT, React, Next.js

**Data and Machine Learning:** pandas, scikit-learn, DuckDB, Power BI, Tableau, Microsoft Excel

**Databases and Tools:** MongoDB, SQLite, Git, GitHub, Docker, Vercel, AWS, Postman

### EXPERIENCE

#### Web Development Intern | Prodigy Infotech

March 2024 – April 2024

- Developed responsive React, JavaScript, HTML and CSS applications from interface requirements and checked their behaviour across desktop and mobile layouts.
- Used Git and GitHub to organise source changes and complete working web deliverables during the remote internship.

### PROJECTS

#### Sampoorna Retail Platform | *Next.js, TypeScript, Java, Spring Boot, Python, FastAPI*

August 2026

- Built a 184-product marketplace with search suggestions, comparison, cart, checkout, recent orders and Jarvis customer support; generated 206 product and service routes.
- Used Spring Boot to handle catalogue, risk, payment, inventory, fulfilment and delivery steps, and FastAPI for recommendations; verified confirmed, declined and unavailable orders with 30 automated tests and deployed the frontend on Vercel.

#### Sentinel Network Threat Detection | *Python, scikit-learn, pandas*

August 2026

- Trained and evaluated a leakage-safe UNSW-NB15 classifier on 175,341 training and 82,332 untouched test flows, reaching 0.935 F1 with threshold analysis and attack-category error review.

#### Mandi Market Price Analytics | *Python, SQL, DuckDB, Power BI*

August 2026

- Cleaned 1,118,899 raw mandi records into 1,117,630 valid facts, designed a DuckDB star schema and created DAX measures with six Power BI-style pages for coverage, price trends, volatility and data quality.

#### Metro Weather Forecasting | *Python, Time Series, Open-Meteo*

August 2026

- Processed 1,753,440 hourly observations for 20 cities and used chronological validation for next-day forecasts, achieving 0.966°C temperature MAE and 0.822 rain F1 on the unseen 2025 test period.

### EDUCATION

#### B.Tech in Computer Science and Engineering | KLH University

2026

Artificial Intelligence and Machine Learning

#### Intermediate | Sri Chaitanya Junior College

2022

#### Secondary School | Alpha High School

2020

### CERTIFICATIONS

AWS Certified Cloud Practitioner | Amazon Web Services

MongoDB Python Developer Path | MongoDB University

RPA Automation Anywhere Certified | Automation Anywhere
